

PDST Junior Science Spring Workshops 2012

Teachers of **Science at Junior Cycle** are invited to **Resource workshops** with colleagues in their local education centre.

Participants will receive and explore two free comprehensive resources.

One includes **over 45 videos of Science on Stage demonstrations**.

The other is the first comprehensive Junior Science resource CD and includes **PowerPoint lesson plans** with embedded **Literacy & Numeracy** suggestions, **Learning Outcomes** and **Assessment**.

Participants on the night will explore how these resources could be used to support the learning and enhancement of literacy and numeracy in Science.

You are invited to **bring along any ideas or resources** that you have found useful in teaching Junior Cycle science.

Workshops will go ahead when there are at least 10 applicants and the resources will be given to participants only, so **book early and don't miss out!**

To Register: complete the attached form and return it by email to sciences@pdst.ie or by fax to 061-585065.

All workshops 7.00 – 9.00 pm
