

Technology in the Special Needs Classroom

This presentation will explore practical uses of technology in the special needs classroom, the use of digital photography, management and editing of digital resources, digital storytelling, multimedia presentations and some literacy and assessment programs.

The presentation will focus on:

- How to create digital stories rich in multimedia that can be used as literacy resources.
- The use of ICT in practical ways to make learning more engaging and effective for students.

The presentation will also demonstrate a number of programs in the assessment and literacy area as resources for the Learning Support teacher.

Athlone Education Centre

Monday, 8th March

7.00pm - 9.30pm

Facilitator: Matt Reville

Matt Reville is a recently retired primary school's Deputy Principal and was a Learning Support teacher for many years. He is a past Chairperson of ILSA and is now a member of the National Committee.
